

Heat Resistant Pan Liners

High Performance Pan Liners made with Recycled Content

Introducing PanSaver RC - the newest development in our PanSaver line of sustainable products. PanSaver RC pan liners feature all the performance of traditional PanSaver brand pan liners, but are made with a minimum of 80% post-consumer recycled content.

What is Post-Consumer Recycled Content?
Recently developed technologies have made it possible to recycle consumer plastic waste, turning it into high quality and hygienic feedstock, called Post-Consumer Recycled Content, that can be used to create new plastic packaging.

How does Post-Consumer Recycled Content Help the Environment?

Plastic packaging plays an essential role in everyday life that is not easily replaced with other materials. Using PCR reduces the amount of petroleum-based plastics necessary for the packaging, and helps keep plastics out of the landfill.

Exclusive PanSaver® RC Pan Liner Features:

- Made with a minimum of 80% Post-Consumer Recycled Content
- Ovenable to 400°F/204°C
- Better durability and stronger seals for increased puncture resistance
- Patented Contour-Fit® construction keeps food out of corners.
- Available in several different stock pan sizes
